MISSION STATEMENT OF MiECTiS

Minimal invasive Extracorporeal Circulation Technology international Society (MiECTiS) is an international and multidisciplinary scientific society dedicated to the investigation, support and further development of physiologically-based minimal invasive extracorporeal perfusion and related technologies.

MiECTiS is committed to the promotion of safe, effective and innovative minimal invasive extracorporeal circulation (MiECC) technologies and related advancements in cardiovascular surgery, anesthesiology and perfusion techniques based on a scientific and evidence-based rationale.

MiECTiS intends to build and maintain relationships with other related scientific societies in order to improve the scientific and clinical aspects of MiECC strategy.
